

Blow-off Check valve G1/8"

Blow-off Check valve G1/8"

- Prevents vacuum from being pulled through the blow-off lines, which means faster response time and completely independent vacuum units.
- Reliable quick-release function even in larger systems with several units, due to the very low feed pressure required to break away for blow-off.
- Suitable in applications where cleaning of the suction cup filters or cooling of the object to be picked is important.

Technical data

Description	Unit	Value
Feed pressure, range	psi	44–101.5
Feed pressure, minimum to breakaway for blow-off	psi	14.5
Material		AL, CuZn, SS, NBR
Temperature range	°F	14–176
Weight	oz	0.44
Flow, rate @ 44-101.5 psi	scfm	3.18–5.93
Connection, compressed air		G1/8"
Connection, vacuum		G1/8"
Dimension, WxDxH	in	0.55x0.55x1.24
