Suction cup with short bellows

- Suitable for level adjustment. Several short bellows in one lifting device can handle objects with height differences and varying shapes, for example embossed or corrugated plates.
- The lifting movement can be used to separate small and thin objects.
- Only lightweight objects should be handled when the lifting force is parallel to the surface of the object, in order to achieve good precision and safe lifting movement.

Outer Dia.	-	orce vertical lbf, at vacuu		-	orce parallel Ibf, at vacuu		Volume	Min. curve radius	Max. vertical movement	Weight rubber part
